Office Action Summary	Application No. 10/663,260	Applicant(s) KORCHAGIN ET AL.	
	Examiner Alvin C. Chin-Shue	Art Unit 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not provide an adequate description of what is the claimed cramp.

Claims 2-4 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 2-4 do not further limit any previously positively recited element.

Claim 6 is objected to because of the following informalities: the phrase “the two elevators” lacks antecedent basis. Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what passenger compartment has the claimed control, as there is no antecedent basis for such compartment.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2-4,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cox in view of German pat. '762 to Boeker. Cox shows the claimed crane with the exception of the elevator portion. Boeker shows an elevator carriage 12 having rail engagement means 36,11. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Cox to comprise an elevator portion, as taught by Boeker, in lieu of his horizontal carriage 21.

Claims 1,2-4,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over German pat. '762 to Boeker in view of Cox. Boeker shows the claimed apparatus with the exception of the crane portion. Cox shows a crane portion to enable both horizontal and vertical positioning of a platform. It would

have been obvious to one of ordinary skill in the art at the time the invention was made to modify Boeker to comprise an crane portion, as taught by Cox, to enable vertical and horizontal positioning of his cabin 9.

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
